WORK HISTORY

NOVEMBER 2016-CURRENT

Software Engineer | The Home Depot | Smyrna, GA

- Wrote maintainable and extensible code in a team environment while adhering to Extreme Programming principles and guidelines.
- Translating wireframes created by UX into beautiful, working web pages
- Worked effectively with design teams to ensure software solutions elevated client side experience.
- Interfaced with business analysts, developers and product owners to determine the best requirement specifications.
- Lead a small team of engineering interns in the design and implementation of an application that was later integrated into our main platform.

JULY 2016-OCTOBER 2016

Student | General Assembly | Atlanta, GA

- Attended a 12-Week (~500 hour) immersive course covering the fundamentals and beyond for web development. Learned and implemented best practices for product development and full-stack development in the form of solo and team projects.

OCTOBER 2012-JULY 2016

Scrum Master and Product Manager | MemberSuite | Atlanta, GA

- Facilitating and leading all Scrum meetings by best practice and leading team discussion to tweak process to increase sprint velocity
- Ensuring on-time delivery of sprint releases by diligently resolving impediments for team members as well as managing internal communication with sprint content and status
- Creating user stories for product enhancements and new features based on research from existing customers and prospects
- Lead an initiative to create manual test case coverage, consisting of over 7,000 tests.

EDUCATION

2012

BBA: Management Information Systems

University of West Georgia, Carrollton, GA
